

## How to Force Proxy Settings via Group Policy on all browsers

<http://www.ashishnepal.com/how-to-force-proxy-settings-via-group-policy-on-all-browsers/>

How to Force Proxy Settings Via Group Policy on all browsers

How to Force Proxy Settings Via Group Policy on all browsers  
i.e. Google Chrome, firefox , IE

This article describes how to force proxy settings via Group Policy.

Click Start – All programs – Administrative Tools – Group Policy Management.  
Create or Edit Group Policy Objects.

[I would recommend doing a new group policy object]

Expand User configuration – Policies – Windows Settings – Internet Explorer Maintenance – Connection.  
In right Pane Proxy Settings.

For some security reasons maybe administrator need to prevent end users from change their proxy settings.  
You can do it with group policy follow this steps:

Click Start – All programs – Administrative Tools – Group Policy Management.  
Create or Edit Group Policy Objects.

Expand Computer Configuration – Administrative Templates – Windows Components – Internet Explorer – Internet Control Panel  
In right Pane Disable the Connections page (Enabled)

Now this above given would help you doing for IE, but how to force proxy settings via Group policy on Google Chrome

Google has provided policy tamplate,

<http://www.chromium.org/administrators/policy-templates>

And so is provided by Firefox aswell.

<http://sourceforge.net/projects/firefoxadm>

How to add firefox/ google adm templates

Expand the “Computer Configuration” level in the tree. for the Group policy object that you want to edit.  
Right-click on “Administrative Templates” and select “Add/Remove Templates”.  
Click the “Add”
