

Where can you find the IP Block List

Where can you find the IP Block List? **Log into your DSM, double click on Security, then go to the Protection tab where, under Auto Block, you'll see the Allow/Block List.** If you'll click on Allow/Block List, a window will appear and contain an Allow List and a Block List.

The screenshot shows the Synology DSM Security settings interface. The 'Security' tab is selected in the left sidebar. The 'Protection' sub-tab is active, and the 'Auto Block' section is expanded. A red arrow points to the 'Security' tab in the sidebar, and another red arrow points to the 'Auto Block' section. A third red arrow points to the 'Allow/Block List' button. The 'Allow/Block List' window is open, showing a table of blocked IP addresses with columns for 'Blocked IP address', 'Time blocked', 'Expiration time', and 'Location'. The table contains several entries, including IP addresses from Russia, China, the United States, and South Korea.

Blocked IP address	Time blocked	Expiration time	Location
141.101.201.88	04-07-2022 05:46:34	25-07-2022 00:46:34	Russian Federation
114.113.233.194	04-07-2022 22:44:57	25-07-2022 22:44:57	China
203.238.45	05-07-2022 00:56:39	26-07-2022 00:56:39	United States of Ame.
221.229.220.113	05-07-2022 01:57:59	26-07-2022 01:57:59	China
106.10.122.53	05-07-2022 08:45:01	26-07-2022 08:45:01	South Korea
196.245.250.10	06-07-2022 18:10:27	27-07-2022 18:10:27	Seychelles
