

Error 711: Cannot load the Remote Access Connection Manager Service.

https://answers.microsoft.com/en-us/windows/forum/windows_7-networking/error-711-cannot-load-the-remote-access-connection/61ef37bd-b21b-4aad-a38c-0a3c9048af5a

This error message appears when a required service isn't started on your computer. You won't be able to connect to a network, and you might not be able to install network adapters.

This problem can occur if some or all of the following services aren't started:

- Plug and Play
- Remote Access Auto Connection Manager
- Remote Access Connection Manager
- Telephony

To fix this problem, follow these steps for each of the services listed above:

1. Open Administrative Tools by clicking the **Start** button, and then clicking **Control Panel**. In the search box, type **administrative tools**, and then click **Administrative Tools**. If you're prompted for an administrator password or confirmation, type the password or provide confirmation.
2. Double-click **Services**. If you're prompted for an administrator password or confirmation, type the password or provide confirmation.
3. Right-click one of the services listed above, and then click **Properties**.
4. Click the **General** tab, and then, next to **Startup type**, select **Manual**.
5. Click **Apply**, and then click **Start**.

Steps to Fix Windows 7 Error 711 Cannot load the Remote Access Connection Manager service

Cannot load the Remote Access Connection Manager service.

Error 711: The operation could not finish because it could not start the Remote Access Connection Manager service in time. Please try the operation again.

To resolve the issue, perform the following steps:

- Click the **Windows** icon on your taskbar, type "**services.msc**" in the Start Search box, right-click **services**, and then click **Run as administrator**.
- If the User Account Control dialog box appears on your screen, click the **Yes** button to continue.
- Locate and right-click **Remote Access Auto Connection Manager** in the right pane of the Services window, and then click **Properties**.
- Select **Manual** from the Startup type drop-down menu under the General tab.
- Click **Apply** to save your changes.
- Click **OK** to exit Remote Access Auto Connection Manager Properties dialog box.
- Next, locate and right-click **Remote Access Connection Manager** in the right pane of the Services window, and then click **Properties**.
- Select **Manual** from the Startup type drop-down menu under the General tab.
- Click **Apply** to save your changes.
- Click **OK** to exit Remote Access Auto Manager Properties dialog box.
- Next, locate and right-click **Telephony** in the right pane of the Services window, and then click **Properties**.
- Select **Manual** from the Startup type drop-down menu under the General tab.
- Click **Apply** to save your changes.
- Click **OK** to exit Telephony Properties dialog box.
- Finally, click the **File** menu in the Service window, and then click **Exit** to close the Services window.
