

How to Reorder Virtual Desktops in Windows 10

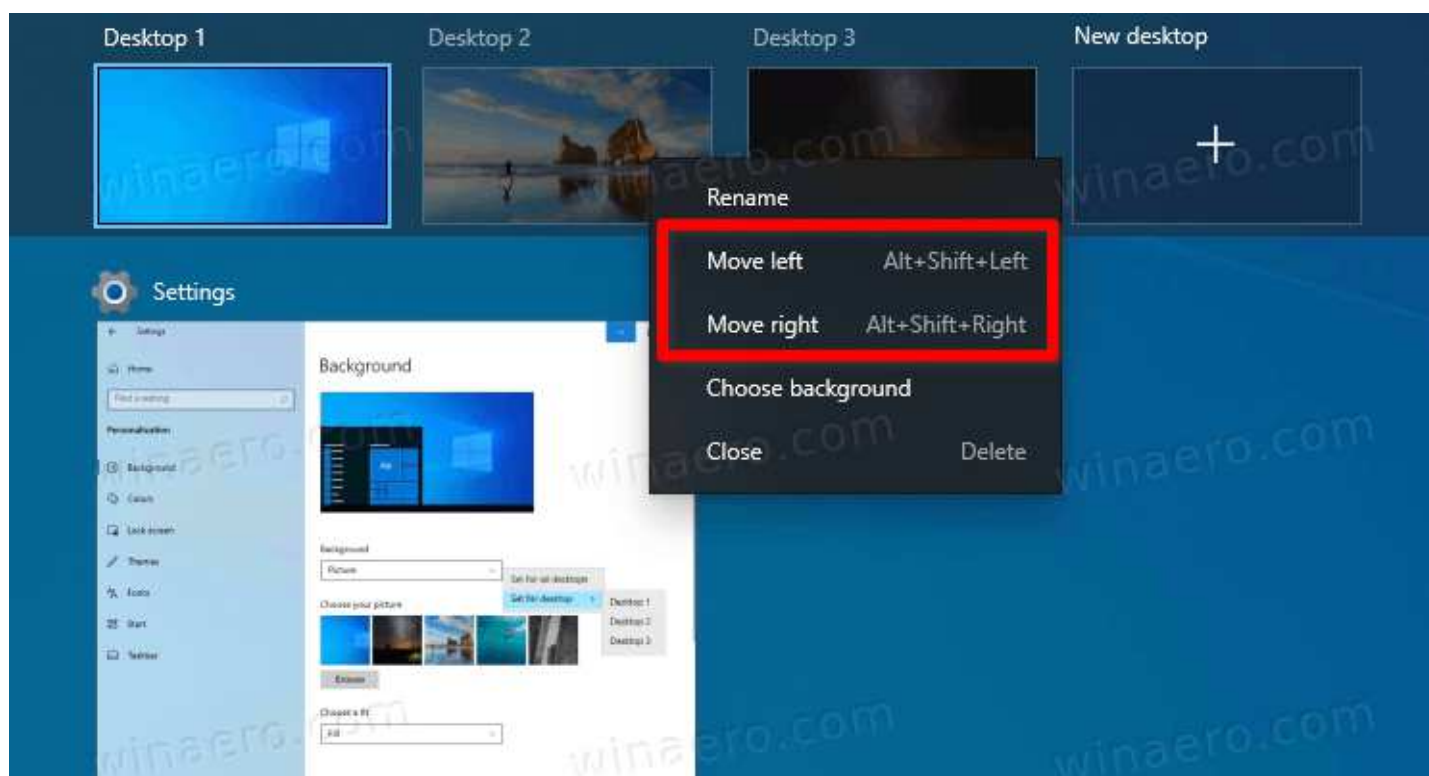

<https://winaero.com/how-to-reorder-virtual-desktops-in-windows-10/>

Here's how to Reorder Virtual Desktops in Windows 10 Task View. The ability to rearrange desktops in Task View is one of the most anticipated features for many users. Finally, Windows 10 now allows doing that.

This post will show you how to reorder Virtual Desktops in the Task View in Windows 10. There are a few methods you can use.

Reorder Virtual Desktops in Windows 10

1. Open the Task View (Win + Tab).
2. To reorder virtual desktops, drag and drop a virtual desktop thumbnail to another place in the Task View list.
3. Alternatively, right-click on a virtual desktop thumbnail, and select *Move left* or *Move right* from the context menu.

4. Finally, you can use the following keyboard shortcuts: **Alt + Shift + Left Arrow** to move left, or **Alt + Shift + Right Arrow** to move right a virtual desktop in the Task View.

You are done.

Note: To try this feature, you obviously must have more than one virtual desktop. You might be interested in learning how to [add a virtual desktop](#).

It's also worth mentioning that commands may appear disabled for the first and last virtual desktops in the Task View. For instance, the "Move left" entry appears disabled for the first (leftmost) desktop, and the "Move right" command is not available for the rightmost virtual desktop.
