

## How to install .CAB file in Windows

### Steps:

1. Download the **CAB Files** x86 / X64 depending upon the OS architecture.
2. Rename **file** to KBnumber.cab (for example KB3176931.**Cab**)
3. Copy to folder C:\
4. Run command-prompt as admin (Right click on **Windows** icon and choose option). ...
5. Enter the command “DISM.exe /Online /Add-Package /PackagePath:c:\KBnumber.**cab**”
